Ramadhan Iftar with Peers:

Strengthening Connections,
Sharing Moments

Jakarta, The holy month of Ramadhan is a time of blessings and forgiveness, cherished by Muslims around the world, including the extended family of DTP Group. To celebrate this sacred occasion, DTP Group comprising DTP, AREA31, and AIX hosted an iftar gathering on March 24, 2025, bringing together corporate partners from various business sectors. The event, titled “Ramadhan Iftar with Peers:

Strengthening Connections, Sharing Moments,” was held at Avenue on 5 and featured a communal iftar. Additionally, attendees participated in a brief session updating them on AREA31 and AIX, followed by an interactive Q&A. The event also included the prestigious “The Highest Traffic of AIX 2025” award, presented to CBN for achieving the highest traffic among members.

To further enliven the evening, a lucky draw offered guests the chance to win exciting prizes, culminating in the grand prize a 43" Smart TV.

One of the honored guests who won the grand prize shared his gratitude and excitement, expressing his surprise at taking home the top reward.

Winning this TV has truly left me trembling with excitement. Wishing continued success for AREA31, thank you so much, AREA31!"

Muhammad Farhan
PT Sandya Sistem Indonesia

Winner of the 43-inch Smart TV

DTP Group hopes this iftar gathering will serve as a meaningful opportunity to strengthen relationships and enhance collaboration among its valued business partners in the future.

Lightening the Burden Together:

DTP's CSR Initiative in Serang, Banten

Serang, In the spirit of the holy month of Ramadhan, on March 25, 2025, DTP reaffirmed its commitment to making a positive impact on the community by organizing a Corporate Social Responsibility (CSR) initiative for the residents of Kebonratu Village, Lebak Wangi District, Serang, Banten. The program, titled "Sembako Murah" (Affordable Basic Necessities), distributed 300 packages containing essential goods to local residents.

Held at the Kebonratu Village Office, the event was attended by the village head and officials, representatives from DTP, security personnel, and community members. It commenced with a symbolic handover of a basic necessities package by Mr. Rasmono Wira Tabahto, General Manager of

Operations and DTP representative, to Mr. Ahmad Guruh Tajul Arasy, the Kebonratu Village Head, representing the local community. Following this, residents exchanged their vouchers for the provided aid packages.

The event was met with enthusiastic participation, as residents eagerly received their packages, expressing deep gratitude and joy. Many conveyed their appreciation to DTP for organizing “Sembako Murah.”

“Thank you for this initiative. It has truly brought joy and much needed support to me. I really appreciate it.” A recipient of the basic necessities package

Beyond material assistance, this CSR initiative fostered a sense of togetherness and strengthened the bond between DTP and the local community. DTP hopes that this event will leave a lasting positive impact and provide tangible benefits for those in need.

Reaching Further, Giving More:

AREA31's CSR Initiative in Tapos, Depok

The holy month of Ramadan presents an ideal opportunity to spread kindness and accumulate blessings. Embracing this spirit, AREA31 organized a Corporate Social Responsibility (CSR) initiative, distributing Ramadhan hampers to residents in the vicinity of AREA31, particularly those in RW 04, Cimpaeun Subdistrict, Tapos, Depok.

A total of 300 hampers containing essential goods were symbolically handed over by Ms. Reashita Sari, Head of Building Management and Purchasing, representing PT Dunia Virtual Online Tbk, to Mr. Sutrisna, Head of RW 04, Cimpaeun Subdistrict, Tapos, Depok. The handover was followed by the distribution of hampers to residents on the same day.

We are deeply grateful to PT Dunia Virtual Online Tbk for supporting our residents, particularly by providing essential goods. This assistance is incredibly valuable for our community and helps ease household expenses."

- Mr. Sutrisna

Head of RW 04, Cimpaeun, Tapos, Depok

Expressing further appreciation, Mr. Holil, Treasurer of the Miftahurrohmah Mosque Welfare Council, acknowledged AREA31's CSR efforts and hoped for a continued positive relationship between the company and the community.

“

As residents living near AREA31, we sincerely hope to foster a strong and lasting relationship between the company and the community for mutual goodwill moving forward.

- Mr. Holil

*Treasurer, Miftahurrohmah
Mosque Welfare Council*

The hampers not only provide practical assistance for households but also reflect AREA31's genuine care for the surrounding community, particularly during this blessed month.

Through this initiative, AREA31 aims to strengthen ties with local residents while reaffirming its commitment to contributing positively to the community.

Biannual Maintenance and Radome Cleaning for SNP#38 Eutelsat OneWeb x DTP

Banten, February 3, 2024, the DTP team officially commenced the Biannual Maintenance for SNP#38 Eutelsat OneWeb x DTP. This maintenance aims to ensure optimal antenna performance by applying additional grease to the gearbox and conducting scheduled radome cleaning.

Implementation of Maintenance Activities

The maintenance began on February 3 and was scheduled for completion by February 26. Grease application is conducted every six months to prevent gearbox wear caused by continuous antenna movement. Meanwhile, radome cleaning is performed annually to remove accumulated debris and prevent leaks.

To streamline the process, the team was divided into two groups:

- **Team 1:** Responsible for radome cleaning, consisting of 4–5 members.
- **Team 2:** Responsible for applying grease inside the radome, consisting of 2–3 members.

Prior to initiating work, the DTP team coordinated with GNOC (Global Network Operations Center) OneWeb London to set the antenna to maintenance

mode. Upon completion of the tasks, and after confirming that no issues or damages were detected in the equipment or radome, GNOC was notified to restore the antenna to in-service mode.

Maintenance Success and Future Improvements

Through structured execution, this maintenance successfully upheld the reliability of the antenna system, ensuring the seamless operation of SNP#38 Eutelsat OneWeb x DTP. The DTP team remains committed to maintaining antenna quality and performance in support of a robust global communications network.

Additionally, the team conducted evaluations on the equipment and work methods used during the

Data Centers and Future Global Challenges

A data center is a facility designed to store and process vast amounts of data. In today's digital era, advancements in Artificial Intelligence (AI) and the Internet of Things (IoT) have significantly

increased data demands. This is where data centers play a crucial role in supporting technological development across various industries, ensuring fast and reliable data access.

Renewable Energy Utilization

As technology continues to evolve, energy consumption needs are growing exponentially.

According to the International Energy Agency (IEA), data centers accounted for 1.2% of global electricity consumption in 2021. The high power demand is necessary to operate servers and cooling systems efficiently. To mitigate environmental impact, many companies are turning to renewable energy sources such as solar, wind, hydro, and other sustainable alternatives to develop eco-friendly data centers.

Operational Efficiency

A key future challenge is optimizing the efficiency of data center operations. As technology advances, data centers will increasingly leverage cutting-edge solutions to maximize resource utilization. One approach is the integration of AI-driven technology for cost optimization and automated monitoring. AI can track various aspects, such as temperature and humidity, ensuring data processing remains fast, secure, and highly responsive when needed.

To remain competitive, data centers must continuously innovate, adapt, and adopt more efficient technologies. Given their vital role in the global digital ecosystem, data centers must evolve to keep pace with rising demands. Without continuous innovation and adaptation, maintaining relevance amid global challenges will be increasingly difficult.

Strengthening Synergy Through Togetherness:

Ramadhan Celebration for DTP and AREA31 Employees

Jakarta & Depok – This year's Ramadhan 1446 Hijri was marked by a joyful iftar gathering for DTP and AREA31 employees. Beyond sharing blessings, this event fostered camaraderie and social awareness among colleagues. Held at two locations, DTP's office at M-Ten Tower and AREA31's office in Cimanggis, Depok, the event provided employees with the opportunity to connect and strengthen their bonds.

The DTP iftar gathering, held on March 17, 2025, was attended by commissioners, directors, and employees from various divisions. The warm and lively atmosphere reflected the enthusiasm of the participants. A selection of delicious dishes and traditional Ramadhan takjil was served to delight DTP employees. Adding to the excitement, engaging games helped break the ice and filled the evening with laughter.

Meanwhile, the celebration at AREA31's office was equally vibrant. Taking place on March 25, 2025, the event welcomed independent commissioners, directors, and all AREA31 employees. Fun activities such as word-guessing and spelling games, along with exciting prize draws, heightened the festive mood. The spirit of teamwork and togetherness was evident in every game, with employees enthusiastically participating in each segment of the event.

Both iftar gatherings were highly anticipated, marking the first in several years following pandemic-related postponements. The strong sense of family and unity cultivated through these events is expected to contribute positively to employee morale and collaboration at DTP and AREA31 in the future.

From Cybercafe to IT Professional

The Journey of Mr. Rasmono Wira Tabahto

Growing up in a military family that frequently relocated, Mr. Rasmono Wira Tabahto experienced a dynamic childhood, never staying in one place for long. Born in Bandung on February 21, 1981, he attended high school in Surabaya and later pursued higher education in Jakarta, where he eventually began his career. His parents, especially his father, a military officer instilled in him a strong work ethic and dedication, despite often being away due to duty assignments.

Mr. Wira, as he is fondly called, studied Computer Engineering at ITS (Institut Teknologi Sepuluh Nopember), specializing in Information Systems. He recognized early on that career opportunities extended beyond conventional roles such as civil servants, doctors, teachers, and soldiers, IT was emerging as a promising sector. Seeking a brighter future, he decided to build his career in Jakarta after graduating.

His first professional role began in 2000 as a technical support staff at PT Warnet Gemilang, where he gained hands-on experience in various IT roles, including programming, network administration, and electrical support. As technical support, he was responsible for ensuring all computers in the cybercafe remained operational throughout business

hours a demanding task that required constant troubleshooting.

During his time at Warnet Gemilang, Mr. Wira crossed paths with Mr. Sugeng, a humble entrepreneur who frequently monitored the cybercafe's operations late into the night. This connection proved significant in Mr. Wira's career trajectory.

In 2006, he joined DTP as a field engineer, at a time when the company was primarily focused on VSAT SCPC technology. By 2007, DTP introduced its first VSAT TDMA using Viasat systems, expanding service accessibility to private businesses, plantations, mining companies, and ISPs.

Before officially joining DTP, Mr. Wira contributed to a WiFi network installation project at a hotel in Ancol, utilizing DTP's backbone infrastructure. Following the successful project, he was offered a position in DTP's field operations team, which focused on NAP (Network Access Point) internet backbone connectivity via VSAT technology. By 2007, DTP collaborated with Matrix to secure an IRU submarine cable with a 4 STM capacity, linking Jakarta to Singapore via Batam.

In 2008, Mr. Wira was promoted to Field Engineer Supervisor, later advancing to Provisioning Manager in 2012. By 2017–2018, he took on the role of Technical Operations Manager, and in 2020, he assumed overall responsibility for DTP's operations.

One of the lesser-known technical milestones he recalls is the development of DTP's Data Center, which started as a small annex room in Cyber Building and later grew into a Tier 3-rated data center. Despite initial skepticism from some clients, DTP's support team proved their capabilities, establishing

trust and reliability in the industry, an integral part of Mr. Wira's journey at DTP.

To tackle technical challenges efficiently, DTP adopted cost-effective solutions, such as building an internal team for antenna installations, previously outsourced to vendors. This approach streamlined coordination and enhanced operational efficiency. Today, DTP has EOS, FO, and wireless teams stationed across Indonesia, supporting various projects, including fiber optic cable installations from Cyber Building (Jakarta) to AREA31 (Cimanggis, Depok).

Mr. Wira also emphasizes the importance of expanding data center interconnectivity. By increasing data center networks, DTP facilitates seamless expansion for clients needing to relocate or increase capacity. Through partnerships with IDC and Techno Village, DTP offers a comprehensive one-stop service, ensuring efficient data center solutions for various business needs.

His guiding principle in operations is upholding Service Level Agreements (SLA) through effective communication and teamwork. He consistently encourages his team to maintain strong interdepartmental collaboration, ensuring swift and efficient problem resolution. With this commitment, DTP continues delivering top-tier services, reinforcing its position in the industry.

Synergy and Camaraderie at the APJII West Java Iftar Gathering

Bandung , March 18, 2025 was a special day for AREA31 and AIX, as they had the opportunity to participate in the iftar gathering hosted by APJII West Java.

Held at La Neo Cafe & Eatery, Bandung, the event, titled “Buka Bersama APJII Jawa Barat 2025” brought together APJII members and key players from the telecommunications industry.

During the gathering, AREA31 and AIX had the chance to introduce themselves and share the latest updates on their corporate achievements.

This event was not merely a casual gathering but also a platform for exchanging ideas, strengthening relationships, and fostering future collaboration particularly in support of West Java’s development in the telecommunications sector.

Closing the event on a warm and unified note, all participants shared an iftar meal, symbolizing solidarity and togetherness. AREA31 and AIX hope that this occasion will not only strengthen ties among APJII West Java members and industry players but also pave the way for future collaborations, driving a better and more connected future
